

What will a Nursery session for your child look like?

Within the provision there will be resources and activities which will suit your child's next steps. We meet as a team daily discussing the next day and how to enhance our provision.

At the start of each session your child will sign in using their name card- regardless of age each child has a name card which they will mark make on.

The session after this is free flow child led with adults supporting play. During this time, adults observe and interact whilst your child is exploring their interests. At this time, using prior knowledge of your child's next steps, an adult will plan an interaction with your child for ongoing development.

At 10am and 2.00pm children will stop and go to their home bases with their key workers – during this time they will discuss the day, weather, do some counting, share their own stories and ideas, singing, phase 1 phonic based activities depending on the groups developmental stage. This may be represented verbally, pictorially, written or a mixture of all three.

At the end of group time children will plan where they are going to play, again this is developmental. Adults go back to develop learning in free flow child led play. Please see below the different ways we enhance your child's learning through our interactions.

At the end of the session children go back to their home bases, have stories and discuss their time at Nursery.

Teaching is to...

explain...
